Life in the paddock

16/10/09 Day Five of ISDE 2009

With only 2 days competition left to secure three finishers medals, this morning's work area seen some preventative maintenance and repairs carried out. Derek was first out of parc ferme and change his clutch plates, successfully reaching the start ramp within his allotted ten minutes. The intense heat and roughness of the tests had taken its toll on Grant's rear shock. His spare was dropped of to the paddock by one of the service crews and Grant went on to swap it in the morning work area. The night previous Ricky sensibly decided that his silencer needed changing today. His second spare silencer would also require a front pipe change, this posed little problems to Ricky and he made it to the start line with time to spare. At the end of today's competition a quick calculation on the unclassified results sees Team Scotland with a fine tally of One Gold and Two Silver medals. At the end of the day with all the machines parked up in parc ferme for the last night came the task of packing up our area in the paddock.
